PROJECT EXPERIENCE

Frontend Developer — Company Website Portfolio Page — PT. Niuva Inovasi Utama 2026

- Built the Portfolio page for the company website using React 19, Tailwind CSS, and Framer Motion, integrated with React Router.
- Redesigned the page's UI/UX to align with the company's visual identity, including scroll animations and an interactive project category filter.
- Coordinated the new page with the existing project structure (FastAPI backend) to ensure smooth integration without disrupting other features.

Library Management System Application — Independent Project 2025

- Developed a dual-role authentication system (Admin & Visitor) using Laravel with role-based access control.
- Implemented real-time book inventory updates and borrowing history tracking through optimized SQL queries.
- Designed and managed a relational database (MySQL) for fast data retrieval, book filtering, and transparent logging.

Tech Stack: PHP, Laravel, MySQL, JavaScript.
